LAST FIVE DAYS TO REGISTER FOR 2019 SEISMIC RETROFIT GRANTS
\$3,000 Grants to Strengthen Older Houses Available in 70 High-Hazard Areas of State

(SACRAMENTO) Registration closes Tuesday at midnight for the 2019 Earthquake Brace + Bolt (EBB) program, which offers eligible homeowners grants of up to \$3,000 for seismic retrofits to strengthen their older houses and make them more resistant to earthquake damage.

With \$3 million in funding from the California Earthquake Authority (CEA) and \$3 million from the Federal Emergency Management Agency (FEMA), EBB will offer 2,000 retrofit grants in 18 additional high-hazard program areas and 76 additional ZIP Codes in 2019. For the first time, homeowners in cities including Alameda, Sonoma, San Jose, Santa Rosa, Richmond, Burbank and Pomona are eligible to apply for grants.

“More than 1.2 million homes in high-seismic-hazard areas of the state are particularly vulnerable to earthquakes because of their type of construction,” said Janiele Maffei, chief mitigation officer of CEA and executive director of EBB. “This program aims to reduce the number of California homes that will be severely damaged by the next big earthquake—and improve communities’ ability to recover by increasing the probability that these homes remain safe and available for shelter.”

Vulnerable houses that can benefit from a brace-and-bolt retrofit are typically built before 1980, have a raised continuous perimeter concrete foundation and may have wood-framed walls in the crawl space under the house. A brace-and-bolt retrofit typically costs between \$3,000 and \$7,000 and helps to prevent the house from toppling off its foundation during strong shaking—damage that can cost hundreds of thousands of dollars to repair.

Launched in 2013 as a pilot in just two California cities, the demand for EBB has increased each year with a [record number](#) of registrants earlier this year for the 2018 program. The not-for-profit CEA, the country’s largest provider of residential earthquake insurance, offers premium discounts of up to 20 percent on CEA earthquake insurance policies for houses with qualifying retrofits.

How to Apply for EBB Grants

Eligible homeowners have five more days—until Nov. 13—to apply for retrofit funding through EBB. To apply and for detailed program information, visit EarthquakeBraceBolt.com. A full list of eligible [ZIP Codes](#) and a [searchable directory](#) of licensed, FEMA-trained contractors with more than 1,000 trained contractors is available. Once registration closes, participating homeowners will be selected through a random drawing and notified via email in early 2019, if they have been selected to participate or if they are on the wait list.

EBB Program Locations in 2019

EBB retrofit grants will be available in 255 select ZIP Codes within the following 70 program areas.

Northern California

Alameda
Albany
Arcata
Berkeley
Burlingame
Coloma
Daly City
El Cerrito
Emeryville
Eureka
Ferndale
Fortuna
Foster City
Hayward
Hillsborough
Loleta
Los Gatos
Menlo Park
Millbrae

Napa
Oakland
Piedmont
Redwood City
Richmond
San Bruno
San Carlos
San Francisco
San Jose
San Leandro
San Lorenzo
San Mateo
San Pablo
Santa Rosa
Sonoma
South San Francisco
Watsonville
Woodside

Southern California

Alhambra
Altadena
Burbank
Claremont
Colton
Fillmore
Glendale
Granada Hills
Highland
La Crescenta
La Verne
Los Angeles
Mission Hills
Monrovia
Montecito
Pasadena
Pomona
Redlands
San Bernardino

San Fernando
San Gabriel
San Marino
Santa Barbara
Santa Monica
Santa Paula
Sierra Madre
South Pasadena
Sun Valley
Sylmar
Tujunga
Valley Village
West Hollywood
Yucaipa

About Earthquake Brace + Bolt (EBB)

Established by the California Residential Mitigation Program, EBB offers up to \$3,000 to help California homeowners retrofit their house to reduce potential damage from earthquakes. A residential seismic retrofit makes a house more resistant to earthquake activity, such as ground shaking and soil failure, by bolting the house to its foundation and adding bracing around the perimeter of the crawl space. For more information, please visit <http://www.EarthquakeBraceBolt.com>.

About the California Residential Mitigation Program (CRMP)

CRMP was established in 2011 to help Californians strengthen their homes against damage from earthquakes. CRMP is a joint powers authority created by the California Earthquake Authority and the California Governor's Office of Emergency Services. For more information, please visit <http://www.CaliforniaResidentialMitigationProgram.com>.
